

A vertical, ornate wooden carving, possibly a column or part of a chair, runs along the left edge of the cover. It features intricate scrollwork, acanthus leaves, and a curved top. The wood is aged and has a warm, golden-brown tone.

kitchens & baths

The heart of the home is the kitchen

THE KITCHEN'S ROLE HAS EVOLVED OVER THE LAST twenty years. Rather than a separate room to be closed off while entertaining, the kitchen is now the heart of the home. Often open to an adjoining den area, this room has transitioned into the space where family and friends gather and spend time talking to the cook.

In order to integrate kitchens into open designs, cabinetry has evolved as well. Quality finishes turn ordinary built-ins that are typically sprayed one color into unique cupboards that appear to be purchased and incorporated into the design, transforming the kitchen from a simple work area into a delightful space for living and entertaining.
